---

## Executive Summary

Motivated Information Technology undergraduate with foundational skills in JavaScript, Python, Node.js, Express.js, MongoDB, MySQL, HTML, CSS, and responsive web development. Eager to apply technical knowledge, contribute to software development projects, and grow professionally as a Junior Software Developer.

---

## Technical Skills

- Programming Languages: JavaScript, Python, HTML5, CSS3, jQuery
- Frontend Technologies: Bootstrap 5, Responsive Web Design, DOM Manipulation
- Backend Technologies: Node.js, Express.js
- Databases: MongoDB, MySQL
- Tools & Software: Git, GitHub, Visual Studio Code, REST APIs

---

## Soft Skills

- Communication & Teamwork
  - Problem Solving
  - Analytical Thinking
  - Time Management
  - Adaptability
  - Continuous Learning
  - Team Collaboration
  - Multilingual Abilities: English, Tamil, Sinhala
-

## Professional Experience

University of Moratuwa – Academic & Personal Software Development Projects | 2024 – Present

Role: Project Contributor

### Responsibilities:

- Designed and developed responsive web applications using HTML, CSS, JavaScript, and Bootstrap
- Built and maintained personal portfolio projects to demonstrate technical competencies
- Developed frontend interfaces with focus on usability and responsive design principles
- Implemented backend functionalities using Node.js and Express.js
- Worked with MongoDB and MySQL for data storage and management
- Utilized Git and GitHub for version control and project management
- Integrated REST APIs into web applications for dynamic functionality
- Created interactive user experiences using JavaScript and DOM manipulation
- Applied software development best practices throughout project lifecycles
- Continuously enhanced technical skills through project-based learning and implementation

### Impact:

- Successfully completed and deployed multiple web development projects
  - Built fully responsive applications accessible across desktop and mobile devices
  - Demonstrated proficiency across frontend, backend, and database technologies
  - Developed a professional portfolio showcasing technical capabilities to potential employers
  - Strengthened practical software engineering skills through hands-on project execution
- 

## Professional Experience

Personal Development Projects | 2024 – Present

Role: Web Developer / Project Contributor

### Responsibilities:

- Developed a personal developer portfolio website to showcase projects and skills
- Designed and built an AI-focused business website with modern user interface components
- Created an e-commerce website featuring product display and responsive layouts
- Built an interactive Simon Memory Game using JavaScript
- Implemented responsive design principles across all projects
- Applied frontend development best practices for performance and usability

- Managed source code repositories using GitHub
- Conducted testing and debugging to improve application functionality
- Maintained project documentation and version control records
- Continuously improved projects based on learning and development goals

**Impact:**

- Completed 4+ fully functional web development projects
  - Created a professional online presence through a live portfolio website
  - Demonstrated practical application of modern web development technologies
  - Improved proficiency in JavaScript, frontend development, and UI design
  - Built deployable projects that showcase real-world development capabilities
- 

**Education**

Bachelor of Information Technology - 2<sup>nd</sup> year student (BIT)  
University of Moratuwa, Sri Lanka 2028 (Expected)

---

**Awards & Accomplishments**

- Frontend Web Development Certification
- Python for Beginners Certification
- Web Design for Beginners Certification
- Data Science and Analytics Certification
- Professional Networking for Career Growth Certification
- Developed and deployed multiple live web applications and portfolio projects
- Built responsive websites using modern frontend and backend technologies
